Testimonial for Life Long Learning

We have been working with Life Long Learning for the past four years. Their expertise in the learning process and their willingness to help us do whatever it takes has drastically helped improve student learning in the core academic areas here at Pacific High School. Using the most up to date research, Ms. Chalk and Mr. Ramirez help teachers write formative assessments (CDAS), plan pacing, differentiate curriculum, and implement instructional strategies designed to engage all students.

Our core departments have made profound improvements. By addressing instruction directly at the point where teachers and students interact, in the classroom, and where teachers collaborate, in their Professional Learning Communities, Life Long Learning ensures long-term academic and cultural change within the school. Life Long Learning works directly with our teachers in their classrooms with their students to improve student learning.

Life Long Learning does not provide a quick fix; they provide the needed guidance and support to transform schools. They are committed to long-term change. And perhaps most importantly, they have the skills and dedication to see school transformation through. Pacific High School made 37 points growth over the past two years. Better still, because of Life Long Learning's coaching, the academic programs are now set for continued and sustained growth.

A handwritten signature in blue ink, appearing to read "D. Deets".
